

SYSTEMIC RISK AND THE TRANSFORMATION OF DEMOCRACY

STEVEN KLEIN

*Senior Lecturer in Political Theory,
Dept. of Political Economy, KCL*

Democracies today are faltering in the face of large-scale systemic risks, such as financial risk and climate change, which are giving rise to new forms of emergency and crisis governance.

This lecture diagnoses our era of systemic risk and asks: how can the politics of systemic risk become democratic?

Time & Location

Tuesday, April 9, 2024
4-6 pm

Sidney Smith 3130
100 St George St.
